

2032 ONE LEVER HEAVY DUTY SIDEMOUNT CONTROL

This side-mount control is intended to control water jets, power take-offs, small mechanical clutches, and various other heavy duty applications where 60 series cable is employed. The long handles provide from 3" to 6" stroke. It is possible to use this model on a two-station (in series) application whereby two levers are provided on the backside of the control for connection of two cables, one to the remote station and one to the item to be controlled. The all bronze and stainless steel construction will give years of trouble-free service.

ORDERING INFORMATION

2032 One lever sidemount control

2032-2 One lever sidemount control for two stations (series connection)

Note: For two stations, in-series applications, one of each control must be ordered.

Example: 1 only 2032 and 1 only 2032-2

LETTER CODE DESIGNATION

K – With Chrome finish flange and handle

L – With polished brass finish flange and handle

M – With Black epoxy finish flange and chrome handle
